

Managed Compliance

Solution Brief

Inverto managed compliance is built on the industry leading M365 platform. Providing an integrated compliance solution that spans across on premise and cloud environments. Protecting and monitoring users and data, no matter where they are located.

Overview

The Inverto modern compliance plans are designed to simplify the approach to compliance by using solutions that natively integrate into existing M365 environments along with capability to plug into third party providers and on premise. Achieving and maintaining compliance in a modern workplace can be challenging, with problems such as.

Skillset Challenges

Traditional IT departments are focused on problem solving and business as usual tasks but are unaware of the broader compliance requirements.

Data Visibility Challenges

Data flows between email exchanges and in and out of various file storage systems. Businesses often lose track of the location of sensitive data, threatening compliance.

Compliance Update Challenges

More than 200 updates across 750 regulatory bodies happen every day. This puts a strain on businesses trying to retain compliance.

About Inverto

Inverto are a modern professional IT organisation. Transitioning businesses to a new way of working with intelligent systems and security baked into the foundations.

Solution

With Inverto Managed Compliance, we remove the headaches that come with understanding compliance changes and bring IT closer to legal and HR departments.

Consolidated Security

The M365 Compliance stack is natively built into your M365 environment. Meaning less time in setup of third-party tools and more time remaining compliant. Consolidate vendors to reduce cost and complexity.

Forever Compliant

Updates to regulation happen every day and cost should not prevent adapting to change. All new features made available on your M365 plan and required changes to solutions are implemented at no extra charge. Keeping you compliant, forever.

Big Picture Management

The Inverto compliance management team fits between existing IT and legal\HR departments. Looking beyond the technical requirement to understand industry regulation and ensure compliance is met.

Third Party Peer Reviews

Can you trust that your compliance solutions have been configured to the highest standard? Inverto provides an independent third-party peer review at no extra cost to provide peace of mind and verification of a compliant environment.

Security Awareness Training

Effective security starts with people, so our Premium customers receive a free security awareness training session each year as part of their plan.

Benefits

- Govern data, no matter where it resides
- Extend your compliance team, not your IT team
- Achieve compliance faster

FAQ

I already use products from different vendors and not ready to switch to Microsoft yet. Will you still manage them?

Inverto supports a broad range of compliance products and vendors that can be used in place (or alongside) the Microsoft stack. Talk to your modern compliance expert to find out more.

I am not sure if these products are a fit for my business. Can I trial them?

Yes of course. Not only can you trial them. Inverto compliance workshops are available to help you understand the benefits of these solutions and how your business can benefit.

Do the plans include the required M365 licencing?

The plans do not include any Microsoft subscription costs.

Can you provide security awareness training on starter and standard plans?

Yes, we can. Security awareness is free for our premium customers and heavily discounted for our starter and standard customers.
