

Managed CIS Controls

Solution Brief

Inverto managed CIS provides you with an industry leading, security framework that is designed to be adapted to any business regardless of its size, industry or security maturity.

Overview

The Inverto CIS plans simplify the approach when it comes to implementing global standards when it comes to security.

Current challenges facing organisations.

Costing Challenges

Many organisations expect large costs when it comes to implementation of security frameworks and often waste time in discovering implementation fees

Time Challenges

Changes to business operations, implementation times and funding allocations can all cause delays and result in missed deadlines.

Skillset Challenges

Many organisations lack the in house expertise and time to implement the required controls and can often end up spending money without improving security posture.

About Inverto

Inverto are a modern professional IT organisation. Transitioning businesses to a new way of working with intelligent systems and security baked into the foundations.

Solution

The goal of the Inverto CIS offering is to make security simple. We do this by removing as many “it depends” answers as possible and providing clear detail on how to achieve a high level of security. The result is a transformation of organisational processes, technological change, and reduced risk. We do this by:

Transparent Pricing

Transparent pricing for basic control implementation means you can meet your business or customer requirements without concern for unexpected costs. Start off your CIS control journey the right way.

Clear Timeframes

Avoid missing those important deadlines. Inverto reduce the risk of extended timeframes by implementing a repeatable processes with transparent pricing that can easily be adjusted to meet your business needs.

Expert Advice

Get access to industry experts to help you navigate through the controls and meet requirements for ensuring a best practice security framework. Engage with our team to roadmap your journey from your initial controls to a complete organisational security framework.

Third Party Review

Can you trust that your security solutions have been configured to the highest standard? Inverto provides an independent third-party peer review and no extra cost to provide peace of mind and verification of a secure environment.

Benefits

- Implement a security framework rather than individual products
- Controls are based on recommendations from industry leaders
- Gain trust with security conscious customers

CIS Plans

Inverto CIS plans have been created to fit your business no matter the size or existing technology stack. Call Inverto to discover how you can implement these important controls.

Plan	Description	Duration	Initial Investment	Monthly Investment
CIS Basic <i>Existing Customers</i>	Category: Basic IG Group: 1	1 - 4 weeks	\$4,900	\$900
CIS Basic <i>New Customers</i>	Category: Basic IG Group: 1	2 - 8 weeks	\$8,900	\$1,500

FAQ

Why is there a difference in price between existing and new customers?

Existing Inverto customers on full stack managed services already have many of the solutions in place to reach this level of security which removes much of the work required. New customers are encouraged to organise an initial session with Inverto to discover what required implementations may already be in place.

Do you offer any other services beyond basic implementation group 1?

Yes, we can help with full implementation of CIS controls. Our approach beyond the current offering is to take a closer look at your current setup as more security mature businesses will likely be compliant with many of the controls.

Do the plans include any required software or hardware?

Plans include licencing for reporting and monitoring related controls. However, any controls that require additional software or hardware are not included.

What technology do you use?

Inverto full stack managed customers use a mixture of our RMM suite, M365 and Fortinet networking solutions to meet the requirements. We work with new customers to maximise their current IT spend and achieve CIS compliance without making drastic changes.

Inverto Managed CIS helps business improve security posture. Resulting in reduced expenditure and faster time to resolution.
