

# M365 Business Premium Managed Security & Compliance

Solution Brief

Inverto managed security is built on the industry leading M365 platform. Providing an integrated security solution that spans across on premise and cloud environments. Protecting and monitoring users and data, no matter where they are located.

## Overview

The Inverto modern security plans are designed to simplify the approach to security by bringing all security products together in a way that makes management easy while providing the highest level of security and visibility into your users, data, apps and infrastructure. Current challenges facing organisations.

### Costing Challenges

Costs are spiralling out of control due to multi-vendor, multi-skillset requirements that result in high fees and complex billing cycles.

### Management Challenges

Poor interoperability and low-quality alerts fail to deliver security teams the information required to prevent or stop an attack.

### Architecture Challenges

Businesses are transitioning to new ways of working faster than ever leaving security struggling to keep up with cloud, hybrid, on prem and WFM environments.

### About Inverto

Inverto are a modern professional IT organisation. Transitioning businesses to a new way of working with intelligent systems and security baked into the foundations.

## Solution

With Inverto Managed Security, we remove the hassle and complicated expense that comes with security by wrapping it all up into an easy to understand offering.

### Consolidated Security

The M365 security stack provides a native solution that does not need to be plugged in to your current environment. This approach provides the highest levels of security and generates quality alerts. All without the headache of trying to get multiple security products to integrate.

### Benefits

- Protect on premise, hybrid and multi cloud environments such as AWS
- Consolidate security vendors
- Reduce risk
- Automate responses to stop attacks quickly

### Forever Secure

All security plans come with Inverto forever secure. Meaning that security is never left behind as new technology and services are added to your M365 subscription. As soon as a new service is available, it can be implemented at no extra cost. Keeping you secure, forever.

### Always on, always managed

Inverto Human and Machine monitoring is a 24/7 service that captures, reacts and stops suspicious and malicious behaviour. Complimented by a security improvement team that reviews configurations, implements new solutions and reports on findings directly to you.

### Third party peer reviews

Can you trust that your security solutions have been configured to the highest standard? Inverto provides an independent third-party peer review at no extra cost to provide peace of mind and verification of a secure environment.

### Security awareness training

Effective security starts with people, so our Premium customers receive a free security awareness training session each year as part of their plan.

## Managed IT Security Plans

Inverto Managed IT Security plans have been created to fit your business no matter the size. Work with our team to discover your requirements or start out small and grow.

## FAQ

**I already use products from different vendors and not ready to switch to Microsoft yet. Will you still manage them?**

*Inverto supports a broad range of security products and vendors that can be used in place (or alongside) the Microsoft stack. Talk to your modern security expert to find out more.*

**I am not sure if these products are a fit for my business. Can I trial them?**

*Yes of course. Not only can you trial them. Inverto security workshops are available to help you understand the benefits of these security products and how they can benefit your business.*

**Do the plans include the required M365 licencing?**

*The plans do not include any subscription costs.*

**Can you provide security awareness training on starter and standard plans?**

*Yes, we can. Security awareness is free for our premium customers and heavily discounted for our starter and standard customers.*

---

*Inverto Managed security helps business consolidate vendors and improve security posture. Resulting in reduced expenditure and faster time to resolution.*
